

VICE PRESIDENT OF VOLUMETRIC TECHNOLOGIES VOLUNTEERS WITH HOPE FOR TOMORROW

October 12, 2011 – Eagan, MN – Beth Piper, vice president at Volumetric Technologies, has a passion for making a difference in her community. As the mother of two adult sons, Beth wanted to make a difference in the life of a girl. Her desire to volunteer drew her to Hope for Tomorrow.

Hope for Tomorrow, a youth-mentoring program created in 1997 by two Minneapolis businesswomen, links young girls in the community with successful, caring women like Beth. Beth will be mentoring an 8th grade girl once a month during the 2011-12 school year, helping her set goals and achieve her dreams.

"I'm excited that I can put everything I've learned throughout my life to use for a young girl," says Beth. "I look forward to helping her blossom into a confident, happy young woman."

ABOUT HOPE FOR TOMORROW

Hope for Tomorrow is a Minnesota based program that works with specific school districts to provide a mentor/mentee relationship with students that have been identified by the school district as potential benefactors of this opportunity.
